PROJECTS

Happy App

A Mental Health App for employees and businesses which monitors happiness levels over time, built for a client over 5 weeks in a team of 12.

- React | Firebase | Pair Programming

COVID 19 Tracker

A responsive app that fetches data from an API and displays it in the forms of map, graph and table. Search functionality allows you to filter through countries.

- React | API integrations | Pair Programming

STRENGTHS

Project Managing

I was a project manager for one week of the client project where I facilitated the assigning of work and was a direct line of communication to the Product Owner.

UX/UI sensibility

I have taken time to further my skills in design as well as used modern syntax throughout my projects to provide accessible applications.

Communication skills

Spent a large amount of time pair-programming with other trainees and worked collaboratively throughout the course.

ACHIEVEMENTS

Taking the leap to Software

I decided to pursue the things I am passionate about.

Project Manager

While working on Happy App, for one sprint I was responsible for communicating with the client, conducting daily scrums, assigning and updating tasks.
